Consultation survey invitation. 1 of 1

## sample invitation

Dear Patient

The practice values your opinion regarding the service it provides you. We want to know what you think of the help you receive from our doctors, nurses and reception staff and would like your suggestions on how we can do better.

You can help by completing an internet questionnaire.

We take your confidentiality very seriously. Your answers will be completely anonymous and the practice will not be able to identify you. We think this is important so that your answers are as frank as possible.

Your responses will be merged with all the other responses and sent to the practice. They may also be made available to other health organisations and again cannot be traced back to you. The information you provide will be analysed in detail as it contributes significantly to the quality standards the practice is contracted to provide.

With your computer connected to the internet go to  
Start the questionnaire by typing in the following code

[www.gpquestion.com](http://www.gpquestion.com)

TEST - TEST - TEST

The questionnaire is very easy to do and takes about 10 minutes. Naturally we cannot respond to any specific question as we cannot identify you, so please contact the practice directly if you would like to discuss a particular issue.

If for any reason you do not complete the questionnaire, please let us know so we can ask someone else.

Thank you for your valued help.
